

PTC-PRJJ Connection installation

1、Please use 1-to-1 Ethernet cable.

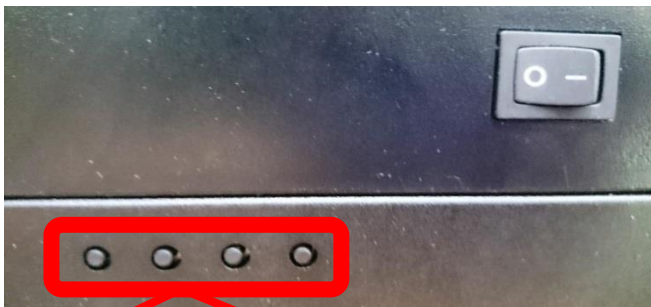

2、One end cable connects to printer ethernet port of lower layer, and the other end connects to the hub. Then the hub connects to display and keyboard.

PTC-PRJJ Installation

1. After receiving the printer, please take the plastic slice.
2. Put paper and connect printer power. (Lack of paper or cover not close properly, the printer will beep.)
3. Turn on the printer. The printer display, customer display, and keyboard display work after two seconds. After all the display shows 000, start to press feed to take tickets.
4. If you want to restart the machine, please turn it off and wait for 10 seconds before turning it on.
